

The Madison Community Health Consortium (MCHC) is a partnership that seeks to improve the overall health of Madison County citizens by networking with community agencies and groups in the on-going process of needs assessment, project development, implementation, and evaluation. The health consortium has been active in Madison County for over 20 years.

It provides a forum for citizens, community agencies, groups, and businesses to identify health issues of Madison County and to seek solutions for those needs. Findings from the community health assessment are used to develop action plans to target the health concerns of the county.

The MCHC welcomes volunteers that may have a special interest in the health needs of the community. Membership is open to anyone living or working in Madison County who is committed to our mission statement and vision of a healthy community. We are always pleased to have new members join us in implementing our action plans.

Below are the action teams that are working to address the 2 priority areas from the 2021 Community Health Assessment (CHA) that were selected by the MCHC members.

- Healthy Eating Active Living Team (HEAL) focusing on Healthy Eating/Healthy Weight and Diabetes
- Madison Substance Awareness Coalition (MSAC) focusing on Substance Use and Mental Health
